About Me

As a highly motivated and solution-oriented individual with a wide range of interests in web development, AI & ML, I am passionate about continuously learning and expanding my skillset. I enjoy sharing my knowledge with others and am adept at motivating both myself and my team to achieve our goals. Currently, I am actively seeking out internship opportunities in the field of web development to gain hands-on experience and further enhance my abilities.

Experience

The Sparks Foundation April 2023

Intern

Solely developed & deployed a dynamic website, simulating the working of a basic bank with features like displaying existing customers, transaction between two customers. Main aim of this task was to test the front-end & back-end skills.
